

Regulation changes EFFECTIVE SEPTEMBER 1, 2011

Texas Administrative Code, Chapter 12.

Recent regulation changes require you to label a Weights and Measures device with a Consumer Information Sticker, and post a new technology enabled Weights and Measures Certificate. The new Consumer Information Sticker will notify the public that the business location must have a current registration certificate displayed in plain sight of, legible to, and physically accessible to the average consumer. Information on the sticker enables a consumer to report an expired registration or a problem with a pump or scale. New technology will allow a consumer to access a licensed location's inspection information and/or file a complaint.

By September 1, 2011 you are REQUIRED to:

- First, affix new Consumer Information Stickers as outlined below
- Then, remove current Texas Department of Agriculture Inspection Seals
- Post new Registration Certificates in an area accessible to consumers

The Package Contains:*

"Fuel Feedback?" Stickers

- Must be in plain sight of and legible to the average consumer accessing the device.
- Must be affixed to each face of each motor fuel-dispensing unit used for commercial transactions.
- Must be affixed to, or placed near, bulk meters and LPG meters.

"Scale Complaint?" Stickers

- Must be in plain sight of and legible to the average consumer accessing the device.
- Must be affixed to, or placed near, each scale used for commercial transactions.

Weights & Measures Certificate

- NEW Weights & Measures Certificates of Registration (RWM-700c) must be prominently displayed in plain sight of, legible to, and physically accessible to the average consumer. Copies of the certificate must be displayed at satellite locations.
- You are not required to post the Certificate of Registration for Weights and Measures sent to you in a previous mailing. (This certificate may be retained in your records.)

TDA Inspection Seals

- Facility owners/operators must remove any TDA inspection seals previously placed on a device, only after affixing a new consumer information sticker.
- Once removed, seals should be destroyed.

Replacement Consumer Information Stickers

- To obtain replacement stickers, complete a Consumer Information Sticker Replacement Order Form (RWM-707) and submit to TDA. You can download the form by going to www.TexasAgriculture.gov.
- Your initial stickers are provided free of charge, and the replacement fee for a page containing eight stickers is \$8.

If location has both fuel pumps and scales, ensure proper sticker is affixed to proper device.

For more detailed information regarding the regulations and changes, visit our website at www.TexasAgriculture.gov. or call (800)-835-5832. You may also email Regulatory@TexasAgriculture.gov.

*Not all packets will contain both Fuel and Scale stickers. Fuel and/or Scale stickers will be included based on the number and type of devices registered to your location. Please contact TDA to report changes regarding the number or type of stickers needed.
