

Contractor’s BABA Compliance Certification

Project Information

Grant Recipient	
Grant Number	
Project Description	

This “*Contractor’s BABA Compliance Certification*” is a form that, in lieu of a Manufacturer’s Certification, the Prime Contractor may use to certify that, as required by the Build America, Buy America (BABA) Act, all of the iron, steel, manufactured products, and construction materials listed in the table below and incorporated into the public infrastructure project specified above are produced in the United States, unless exempted by a HUD general waiver or a project-/product-specific waiver approved by HUD and the Made in America Office (MIAO) at the Office of Management and Budget (OMB).

For Covered Materials not otherwise exempted from BABA requirements, the undersigned certifies the following:

- All iron and steel used in the project are produced in the United States. This means all manufacturing processes, from the initial melting stage through the application of coatings occurred in the United States;
- All manufactured products used in the project are produced in the United States. This means the manufactured product was manufactured in the United States, and the cost of the components of the manufactured product that are mine, produced, or manufactured in the United States is greater than 55 percent of the total cost of all components of the manufactured product, unless another standard that meets or exceeds this standard has been established under applicable law or regulation for determining the minimum amount of domestic content of the manufactured product; and
- All construction materials used in the project are manufactured in the United States. This means that all manufacturing processes for the construction material occurred in the United States.

Use the table below to list all Covered Materials procured by the signatory, used in the project, and to be certified as BABA Compliant by the signatory. (If a material used in the project has been documented as BABA Compliant through another approved method, it does not need to be included on this list.)

For “Type of Material”: Indicate if the material is Iron, Steel, Manufactured Product, or Construction Material.

Type of Material	Material	Cost Per Unit	Total Cost	Manufacturer
